08/21/2025	General Motors	<b>Manufacturer Safety recall issued</b> - NHTSA #25V536 - Transport Canada# 25429 - Recall #N252514930 FIRE RISK DURING FUEL FILL - Status: Remedy Available  Locate an authorized General Motors dealer to obtain more information about this recall.
------------	----------------	--

 [Learn more about this recall](#)

**Description:** General Motors has decided that a defect which relates to motor vehicle safety may exist in certain 2023 - 2026 model year Chevrolet Corvette vehicles equipped with a left-side radiator/fan combination. In these vehicles, excess fuel spilled into the vehicle fuel-filler pocket during refueling may leak onto the radiator, vaporize, and migrate to the engine compartment where the vapors may be exposed to an ignition source. If fuel vapor contacts an ignition source, there is increased risk of a fire. To reduce the risk of the condition occurring, owners should always follow the fueling instructions in their owner's manual. Always confirm that the fuel nozzle is completely inserted into the vehicle's fuel pipe before fueling. Never overfill the tank or attempt to fill after the fuel pump's automatic shut off clicks once. Always turn off the vehicle's engine during refueling.

If fuel vapor contacts an ignition source, there is increased risk of a fire. To reduce the risk of the condition occurring, owners should always follow the fueling instructions in their owner's manual. Always confirm that the fuel nozzle is completely inserted into the vehicle's fuel pipe before fueling. Never overfill the tank or attempt to fill after the fuel pump's automatic shut off clicks once. Always turn off the vehicle's engine during refueling.

**Remedy:** Dealers will install a new bezel with an insert / shield to divert spilled fuel.

## **CARFAX** Glossary

### **CARFAX Well Maintained - Regular Oil Changes**

CARFAX identifies a "Well Maintained - Regular Oil Change" vehicle as having a regular oil change history when all its recommended oil changes, based on the vehicle's maintenance schedule, have been reported to CARFAX. CARFAX uses the manufacturer's schedule and assumes normal driving conditions. When an oil change schedule is not available, CARFAX may analyze reported service events to determine what is typical for the same make and model vehicle. Dealers and service shops may publish different recommended service schedules.

### **First Owner**

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

### **Manufacturer Recall**

Automobile manufacturers issue recall notices to inform vehicle owners of a safety defect or failure to meet minimum federal safety or emissions standards. Manufacturer recalls are repaired at no cost to the customer.

### **Ownership History**

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

### **Title Issued**

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.
